VEIL ENTERPRISE

PROVIDING THE TRANSITION FROM COMMUNICATION SECURITY TO INFORMATION SECURITY

For more information or
product demonstration of

OpenVEIL[®]

OpenVEIL[®] is the Open Source connector to KeyVEIL[®] that allows applications to be written that are CKM Enabled[®] through the use of the KeyVEIL[®] key management system. OpenVEIL[®] also includes cryptographic algorithms and protocols that can be used to provide bulk data encryption services to applications.
